We advocate the quality style comprising high growth, defensive earnings, high dividend yield and low debt / equity in the mid-large cap part of the market while actively managing beta. We believe, macro policy changes, liquidity, commodity prices and growth expectations will remain key drivers of risky asset prices. Given the heightened volatility and uncertainty about medium-term growth; we continue to momentarily overweight cash and sukuk but continue to believe equities remain the asset class offering the best relative valuations and prospective returns over the long(er) term.
